▬ WORK EXPERIENCE

MIPT

Data analyst   2022

- Analyzed and visualized data using Python. During my work I managed to analyze a football match, constantly tracking the position of the ball and all the players. Worked with csv, excel and json files.

Atyraumunai

Technical CEO   2024

- Was engaged in the development of a digital model of the field to optimize the use of resources. For this project, I made a prototype and began testing. Also worked on a system for monitoring production parameters. As part of this system, I designed a model for terminal by Verilog tracking of the network. Was responsible for the technical equipment of the company.

AstanaHub

Python developer   Present

- Worked on manual and automated testing. Improved the backend of the Astana Hub portal. Wrote queries for the database. Wrote commands for Django. Optimized the existing code. Worked with the frontend using API. Wrote scripts for automatic restoring of posts from Instagram to Telegram

▬ EDUCATION

MIPT

Bachelor   2023

- Department of Radio Engineering and Cybernetics

▬ PROJECT

Telegram/Instagram bots   Present

- made bots for YouTubers for mailing, for automation of processes

Django site   Present

- Site to predict weather

Terminal device   2023

- Terminal with fast network connection
